b. **Task Board –** Serves as reminder for task assign to yourself or other colleagues.

ARMMC DTS

Document Tracking System Orientation and Training

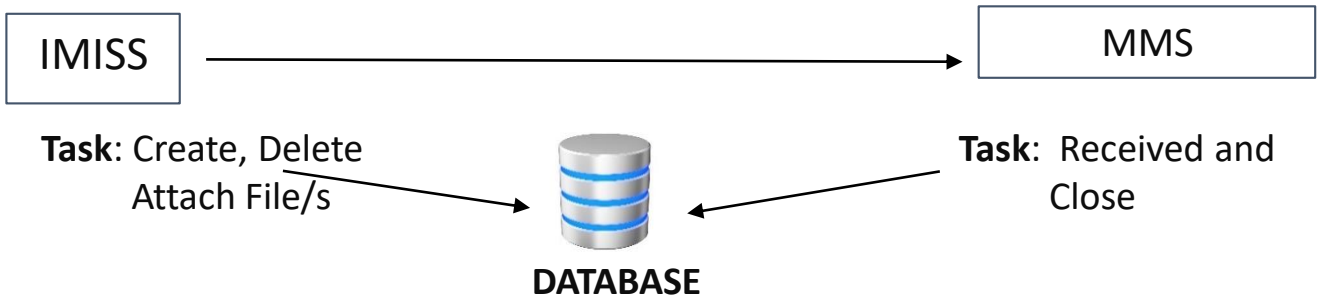
ORIENTATION AND TRAINING OBJECTIVES

1

1. Define Document Tracking System and its concept

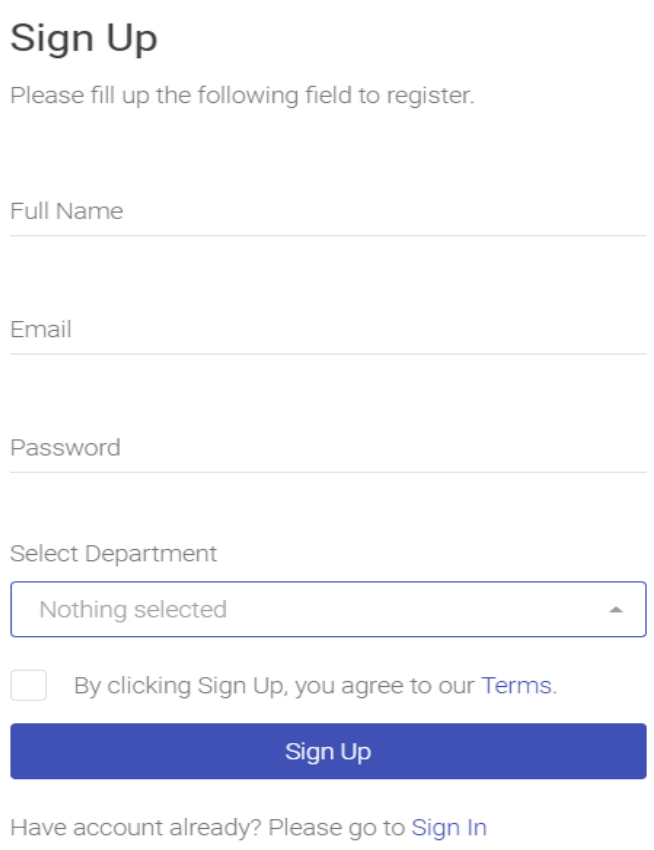
2

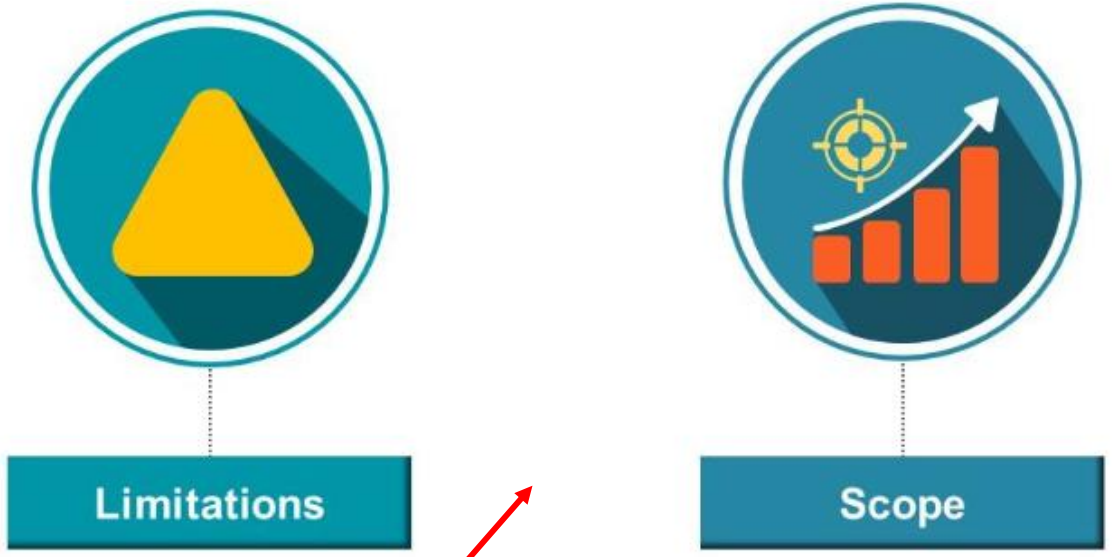
Process Flow



2. Describe the process flow of the Document Tracking System

3





3. Know all user's responsibilities and be able to explain each of them.
4. Identify the scope and delimitation of the Document Tracking System.

4

What is DTS?

- DTS – Document Tracking System
- DTS is a responsive local-based electronic document tracking system designed to automate the process of accessing, searching, and monitoring a document’s location. One of the key benefits of using a web app for document tracking is that it eliminates the need for paper-based documents and manual tracking systems. This reduces the risk of errors, loss, or damage to important documents, and can save time and resources.

Software
Development

Use of DTS

Documents: An electronic document tracking system can be used to track the movement of documents within an institution, such as RIS, PR, HO, Memo, Communication, Forms, and other important documents.

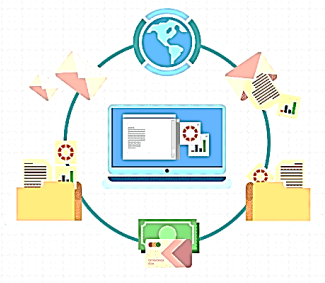
DTS Scope and Delimitation

1. Register users /Edit user profiles
2. Generate Tracking Number
3. Upload and attach multiple files
4. Forward document to MULTIPLE departments.
5. Records created, received, forwarded and closed documents
6. Track document record history
7. Generate reports for created, received, forwarded and closed documents

1. The system cannot receive multiple documents at a time.
2. The system cannot forward multiple documents at a time
3. System can only access locally within ARMMC vicinity.

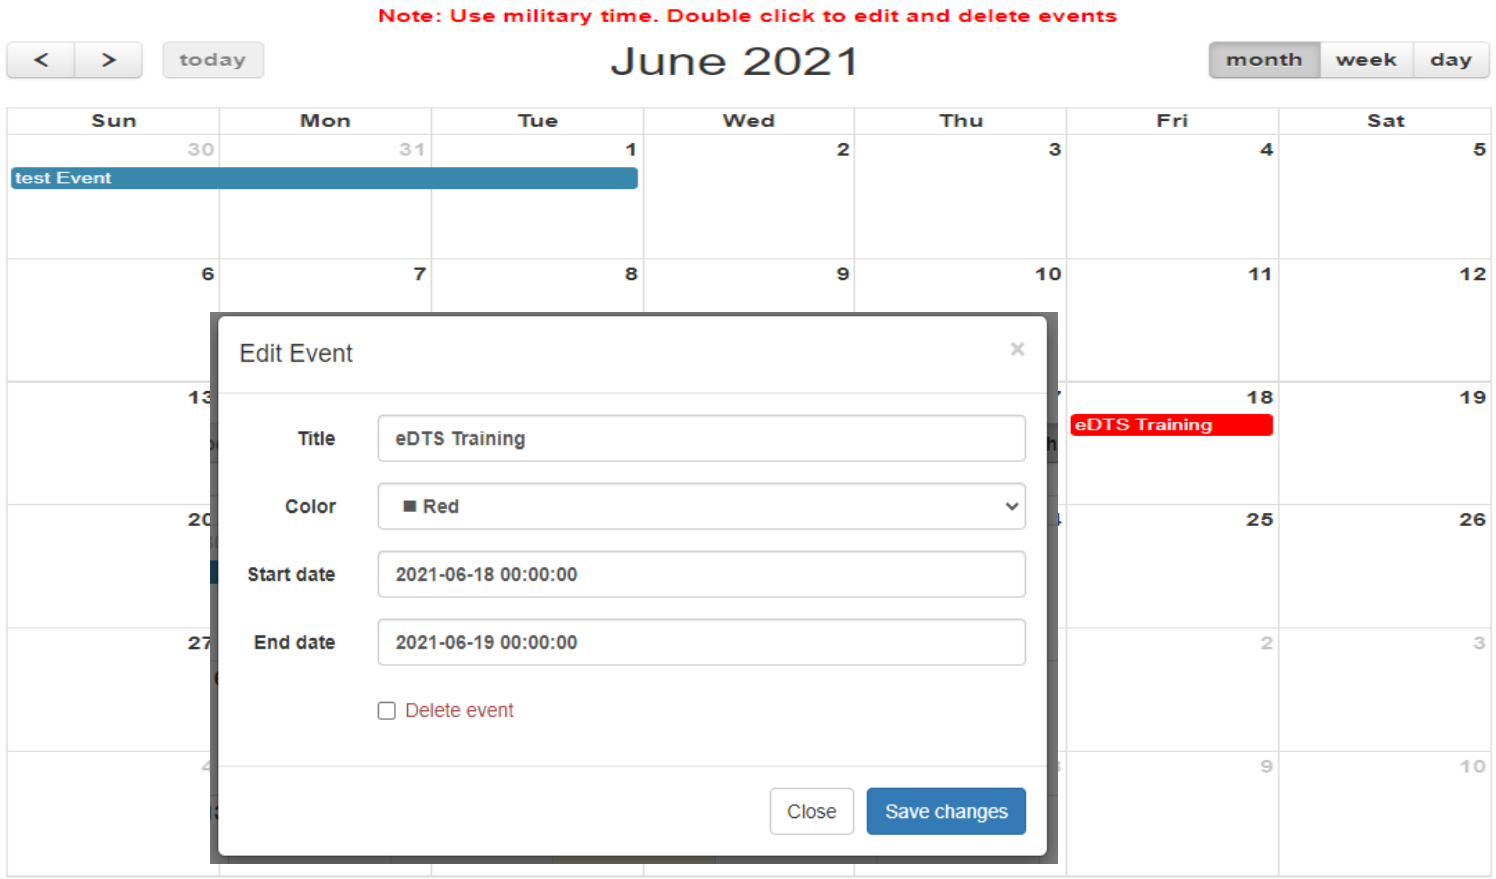
Users Responsibilities

- Users must create a tracking number on the system, write the tracking number on the physical documents before sending them to the recipients.
- Users must only accept incoming documents on the system upon receiving the physical files.
- Users must close the documents they received if they are the last recipient of the files.
- Users may forward received documents to other departments.
- For information dissemination, users may scan the physical documents and attach them to the system before sending them to the recipients.
- Users are responsible for all use of their accounts.
- Users may contact IMISS office for forgotten/reset password.
- User may request technical assistance to IMISS for any bugs and error encountered.



Other Features

- Events Calendar
- DTS Manual



Thank You!
